Volume Contents

Volume 16 Number 1

A. MILANI	1	Long time existence and singular perturbation results for quasilinear hyperbolic equations with small parameter and dissipation term—III
JONG-SHENQ GUO	13	A variational inequality associated with a lubrication problem
J. E. LAGNESE	35	Uniform asymptotic energy estimates for solutions of the equations of dynamic plane elasticity with nonlinear dissipation at the boundary
A. M. FINK	55	A two-dimensional Opial theorem and a predator–prey model
R. TORREJÓN and JIONGMIN YONG	61	On a quasilinear wave equation with memory
F. DEMENGEL and J. M. GHIDAGLIA	79	Some remarks on the smoothness of inertial manifolds
N. LAKOŠ	89	Positive solutions of systems of nonlinear eigenvalue problems
CORRIGENDUM	99	
SOFTWARE SURVEY SECTION	I	

Volume 16 Number 2

ZHENG ZUO-HUAN	101	On the nonexistence of periodic solutions for Liénard equations
J. E. FRANKE and A.-A. YAKUBU	111	Global attractors in competitive systems
M. C. MEMORY	131	Stable and unstable manifolds for partial functional differential equations
G. BARLES and P. L. LIONS	143	Fully nonlinear Neumann type boundary conditions for first-order Hamilton–Jacobi equations
C. M. ELLIOTT, A. MIKELIĆ and M. SHILLOR	155	Constrained anisotropic elastic materials in unilateral contact with or without friction

GE WEIGAO 183 On the existence of harmonic solutions of Liénard systems

A. FIORENZA 191 An inequality for Jensen means

SOFTWARE SURVEY SECTION I

Volume 16 Number 3

LU YUN-GUANG 199 Existence and asymptotic behavior of solutions to inhomogeneous equations of elasticity with little viscosity

P. D. PANAGIOTOPOULOS 209 Coercive and semicoercive hemivariational inequalities

R. LUI 233 Existence and stability of travelling wave solutions for a simplified bistable evolutionary ecology model

H. ATTOUCH, D. AZÉ AND G. BEER 241 On some inverse stability problems for the epigraphical sum

V. LAKSHMIKANTHAM, S. LEELA AND M. RAM MOHAN RAO 255 New directions in the method of vector Lyapunov functions

WENXIONG LIU 263 A parabolic system arising in film development

SONG-SUN LIN 283 On the number of positive solutions for nonlinear elliptic equations when a parameter is large

SOFTWARE SURVEY SECTION I

Volume 16 Number 4

S. N. ANTONTSEV and J. I. DÍAZ 299 Space and time localization in the flow of two immiscible fluids through a porous medium: energy methods applied to systems

S. B. AGASE and S. LEELA 315 Perturbing Lyapunov functions and global results

A. M. KRASNOSEL'SKII 321 On a method of analysis of resonance problems

L.-E. ANDERSSON 347 A quasistatic frictional problem with normal compliance

D. G. Costa and E. A. de B. e Silva — 371 — The Palais–Smale condition versus coercivity

D. R. Dunninger and M. Miklavčič — 383 — On a semilinear biharmonic equation

T. A. Burton and L. Hatvani — 389 — On the existence of periodic solutions of some nonlinear functional differential equations with unbounded delay

Software Survey Section — I

Volume 16 Number 5

P J. Rabier — 399 — Topological degree and the theorem of Borsuk for general covariant mappings with applications

J. Berkovits and V. Mustonen — 421 — On multiple solutions for a class of semilinear wave equations

Man Kam Kwong — 435 — Uniqueness results for Emden–Fowler boundary value problems

E. A. de B. e Silva — 455 — Linking theorems and applications to semilinear elliptic problems at resonance

W. E. Fitzgibbon and M. E. Parrott — 479 — Linearized stability of semilinear delay equations in fractional power spaces

W. H. Yang — 489 — On generalized Hölder inequality

Software Survey Section — I

Volume 16 Number 6

M. Fečkan — 499 — A symmetry theorem for variational problems

D. O'Regan — 507 — Solvability of some second and higher order boundary value problems

K. P. Rybakowski — 517 — Formulas for higher-order Fréchet derivatives of composite maps, implicitly defined maps and solutions of differential equations

T. D. Donchev — 533 — Functional differential inclusion with monotone right-hand side

R. KERSNER and F. NICOLOSI 543 On the free boundaries in a nonlinear diffusion–convection problem with positive initial conditions

M. GANESH and M. C. JOSHI 553 Optimality of nonlinear control systems

A. CANINO 567 Periodic solutions of Lagrangian systems on manifolds with boundary

U. BESSI and V. COTI ZELATI 587 Symmetries and noncollision closed orbits for planar N-body-type problems

SOFTWARE SURVEY SECTION I

Volume 16 Number 7/8

I. FLAHAUT 599 Attractors for the dissipative Zakharov system

S. K. KAUL 635 On impulsive semidynamical systems—II. Recursive properties

W. C. RHEINBOLDT 647 On the existence and uniqueness of solutions of nonlinear semi-implicit differential–algebraic equations

S. UMAMAHESWARAM and M. VENKATA RAMA 663 Existence theorems for some special types of boundary value problems

J. BANAŚ 669 Compactness conditions in the geometric theory of Banach spaces

A. I. SUBBOTIN 683 Existence and uniqueness results for Hamilton–Jacobi equations

Z. ARTSTEIN 701 Extensions of Lipschitz selections and an application to differential inclusions

N. C. OWEN and P. STERNBERG 705 Nonconvex variational problems with anisotropic perturbations

G. MAKAY 721 On the asymptotic stability in terms of two measures for functional differential equations

SOFTWARE SURVEY SECTION I

Volume 16 Number 9

A. Friedman and Bei Hu	729	A free boundary problem arising in electrophotography
Yousong Luo	761	On the quasilinear elliptic Venttsel boundary value problem
C. H. Morales	771	Remarks on compact perturbations of m-accretive operators
Zongming Guo	781	Solvability of some singular nonlinear boundary value problems and existence of positive radial solutions of some nonlinear elliptic problems
D. Percivale	791	A remark on relaxation of integral functionals
Hiroyuki Usami	795	On positive decaying solutions of singular Emden–Fowler-type equations
Software Survey Section	I	

Volume 16 Number 10

A. Capozzi, S. Solimini and S. Terracini	805	On a class of dynamical systems with singular potential
P. P. Zabrejko	817	Abstract relationship principles in the theory of nonlinear operator equations
V. Vespri	827	On the local behaviour of solutions of certain singular parabolic equations
C. Martinez-Yanez	847	A remark on weakly inward contractions
P. B. Chapman and J. L. Noakes	849	Singular perturbations and interpolation—a problem in robotics
J. Santanilla	861	Existence and nonexistence of positive radial solutions for some semilinear elliptic problems in annular domains
C. M. Brauner, S. Noor Ebad and Cl. Schmidt-Lainé	881	Nonlinear stability analysis of singular travelling waves in combustion—a one-phase problem
S. Ahmad and A. C. Lazer	893	An elementary approach to traveling front solutions to a system of N competition-diffusion equations
Software Survey Section	I	

Volume 16 Number 11

S. Solimini and S. Terracini	903	A multiplicity result for periodic solutions of autonomous conservative systems
P. Hess and A. C. Lazer	917	On an abstract competition model and applications
J. M. Gonçalves Ribeiro	941	Finite time blow-up for some nonlinear Schrödinger equations with an external magnetic field
C. P. Gupta and V. Lakshmikantham	949	Existence and uniqueness theorems for a third-order three-point boundary value problem
K. Pŕomislow	959	Time analyticity and Gevrey regularity for solutions of a class of dissipative partial differential equations
M. Pinto	981	Continuation, nonoscillation and asymptotic formulae of solutions of second order nonlinear differential equations
I. Fukuda and M. Tsutsumi	997	The initial-boundary value problem for a nonlinear degenerate parabolic equation
K. Hayasida	1011	On a backward estimate of solutions of the porous media equation
N. Mizoguchi	1025	Existence of nontrivial solutions of partial differential equations with discontinuous nonlinearities
M. València	1035	Invariant regions and asymptotic bounds for a hyperbolic version of the nerve equation
E. Feireisl	1053	A note on uniqueness for parabolic problems with discontinuous nonlinearities
Software Survey Section	I	

Volume 16 Number 12

Xinfu Chen	1057	Axially symmetric jets of compressible fluid
M. G. Garroni and M. A. Vivaldi	1089	Quasilinear, parabolic, integro-differential problems with nonlinear oblique boundary conditions
T. Roubíček	1117	Convex compactifications and special extensions of optimization problems

HONG-KUN XU	1127	Inequalities in Banach spaces with applications
HONG-KUN XU	1139	Existence and convergence for fixed points of mappings of asymptotically nonexpansive type
K. J. BROWN and P. HESS	1147	Positive periodic solutions of predator–prey reaction–diffusion systems
A. RUMBOS	1159	A semilinear elliptic boundary value problem at resonance where the nonlinearity may grow linearly
N. ELEZOVIĆ and A. MIKELIĆ	1169	On the stochastic Cahn–Hilliard equation
